

WEEKLY UPDATE

2/10/2021

Dear Residents and Families/Representatives,

Please accept this letter as our weekly update regarding the status of COVID-19 in our facility. Since the onset of this virus, we have had 35 residents and 32 staff members test positive for COVID-19. Fairfield has completed 31 weeks of weekly staff testing and we are happy to report that no employees tested positive for COVID-19 during this round. We have completed our 15th round of testing all the residents in the facility and are waiting for the results. Once the results are received, Fairfield will determine whether or not to continue with outbreak testing for surveillance purposes or conclude the outbreak investigation. During this time, visitation will not be allowed. Exceptions will be made for compassionate care situations.

We are committed to eliminating this virus from our facility, and as we previously reported, we will continue to implement and practice enhanced safety precautions recommended by our federal, state and local health officials, such as, only allowing essential personnel inside the facility, performing regular screenings for signs and symptoms of illness prior to entering the building, continually monitoring residents, performing regular deep cleanings, using PPE as recommended by the CDC, providing individual activities as opposed to group activities, implementing isolation protocols as required, and reminding and encouraging staff to practice social distancing and to use hand sanitizer and frequently wash their hands when they are in the facility and out in the community. We ask them not to report to work if they have symptoms of illness.

Please continue to check our website for weekly updates as well as notification of new cases. As always, we will notify you if we receive confirmation of a new positive case in our facility and we will reach out to you individually if your loved one is displaying symptoms of COVID-19 or tests positive for COVID-19.

If you have any questions or concerns please contact us directly at (410) 923-6820.

Sincerely,

Charles Woodberry, MS., LNHA

WEEKLY UPDATE

2/18/2021

Dear Residents and Families/Representatives,

Please accept this letter as our weekly update regarding the status of COVID-19 in our facility. Since the onset of this virus, we have had 35 residents and 32 staff members test positive for COVID-19. Fairfield has completed 32 weeks of weekly staff testing and we are happy to report that no employees tested positive for COVID-19 during this round. We have completed our 16th round of testing all the residents in the facility and we are happy to report that no residents tested positive for COVID-19. All test results for employee's and residents for the past 14 days have been negative, and we are happy to report the Local Health Department has concluded the outbreak investigation. Fairfield will implement its indoor visitation plan starting next week. The indoor visitation guidelines are as follows:

- a) **Visitors will be required to have a negative COVID-19 test within 72 hours of their visit.**
- b) The facility may not have any new onset of COVID-19 cases in the last 14 days and cannot be conducting outbreak testing.
- c) The facility will ensure that visitors adhere to core principles to include children.
- d) The facility will limit the number of visitors per resident and the number of visitors allowed in the facility at one time based on the size of the facility.
- e) The facility will schedule visits with time limits to allow all residents to receive visitors.
- f) The facility will limit movement of visitors; to include direct routes to designated visitation area.
- g) The facility will not conduct visitation in shared rooms unless the resident cannot leave the room due to health status. In that event the facility will ensure adherence to core principles of COVID-19 infection prevention.
- h) The facility will monitor their county positivity rate as additional information to determine indoor visitation. The facilities that are in low (<5%) and medium (5%-10%) should conduct visitation according to the core principles of COVID-19 infection prevention and facility policies beyond compassionate care visits. Those facilities that are in high (>10%) should only conduct for compassionate care situations according to the core principles of COVID-19 infection prevention and facility policies.
- i) The facility may monitor other factors that increase COVID-19 risk levels to include: rates of COVID-19 like illnesses, visits to the emergency department, or positivity rate of a county adjacent to the county where the nursing home is located.

We are committed to eliminating this virus from our facility, and as we previously reported, we will continue to implement and practice enhanced safety precautions recommended by our federal, state and local health officials, such as, only allowing essential personnel inside the facility, performing regular screenings for signs and symptoms of illness prior to entering the building, continually monitoring residents, performing regular deep cleanings, using PPE as recommended by the CDC, providing individual activities as opposed to group activities, implementing isolation protocols as required, and reminding and encouraging staff to practice social distancing and to use hand sanitizer and frequently wash their hands when they are in the facility and out in the community. We ask them not to report to work if they have symptoms of illness.

WEEKLY UPDATE

2/25/2021

Dear Residents and Families/Representatives,

Please accept this letter as our weekly update regarding the status of COVID-19 in our facility. Since the onset of this virus, we have had 35 residents and 32 staff members test positive for COVID-19. Fairfield has completed 33 weeks of weekly staff testing and we are happy to report that no employees tested positive for COVID-19 during this round. We have completed our 17th round of testing all the residents in the facility and we are happy to report that no residents tested positive for COVID-19. All test results for employee's and residents for the past 21 days have been negative. Fairfield's indoor visitation plan has been implemented for 1 week. The indoor visitation guidelines are as follows:

- a) **Visitors will be required to have a negative COVID-19 test within 72 hours of their visit.**
- b) The facility may not have any new onset of COVID-19 cases in the last 14 days and cannot be conducting outbreak testing.
- c) The facility will ensure that visitors adhere to core principles to include children.
- d) The facility will limit the number of visitors per resident and the number of visitors allowed in the facility at one time based on the size of the facility.
- e) The facility will schedule visits with time limits to allow all residents to receive visitors.
- f) The facility will limit movement of visitors; to include direct routes to designated visitation area.

WEEKLY UPDATE

2/4/2021

Dear Residents and Families/Representatives,

Please accept this letter as our weekly update regarding the status of COVID-19 in our facility. Since the onset of this virus, we have had 35 residents and 32 staff members test positive for COVID-19. Fairfield has completed 30 weeks of weekly staff testing and we are happy to report that no employees tested positive for COVID-19 during this round. We have completed our 14th round of testing all the residents in the facility and we are happy to report that no residents tested positive for COVID-19. Fairfield will be conducting outbreak testing for one more week for surveillance purposes. During this time, visitation will not be allowed. Exceptions will be made for compassionate care situations.

We are committed to eliminating this virus from our facility, and as we previously reported, we will continue to implement and practice enhanced safety precautions recommended by our federal, state and local health officials, such as, only allowing essential personnel inside the facility, performing regular screenings for signs and symptoms of illness prior to entering the building, continually monitoring residents, performing regular deep cleanings, using PPE as recommended by the CDC, providing individual activities as opposed to group activities, implementing isolation protocols as required, and reminding and encouraging staff to practice social distancing and to use hand sanitizer and frequently wash their hands when they are in the facility and out in the community. We ask them not to report to work if they have symptoms of illness.

Please continue to check our website for weekly updates as well as notification of new cases.
